Why choose us?

Theraposture has been a leading name in adjustable chairs and beds for over 30 years. We are a family-run business supporting all of the UK which takes pride in delivering independence with peace of mind. As BHTA members, we adopt their Code of Conduct which is approved by Trading Standards. Hence, Theraposture are a trusted and much used supplier to Occupational Therapists and Healthcare Professionals.

We are committed to understanding your needs fully so that our Assessors can always recommend the correct chair for you. This unique level of service is further enhanced by our 14-day Suitability Guarantee.

We provide an unlimited choice in rise and recliner designs so your individual tastes and needs are always met. From beautiful fabrics and leather through to a variety of

movements and styles, we have everything to make the perfect chair for you.

When you choose Theraposture you can relax. We will take care of every step from our friendly assessment at your home right through to installation and after-sales care.

Freedom at home is only one call away.

“Be independent, be comfortable”

Call us today to arrange a home assessment with a professional and trusted Assessor:

If you are struggling to sit comfortably in your armchair at home, we can help. You may also want greater independence to stand and sit safely without the assistance of a relative, carer or friend – this is where one of our tailor-made adjustable chairs can change your life.

With a chair designed specifically for your individual size and needs, we can ensure you remain appropriately supported when sitting or moving in and out of a chair. You can also enjoy sitting or reclining for extended periods of time without the inconvenience of regular readjustment.

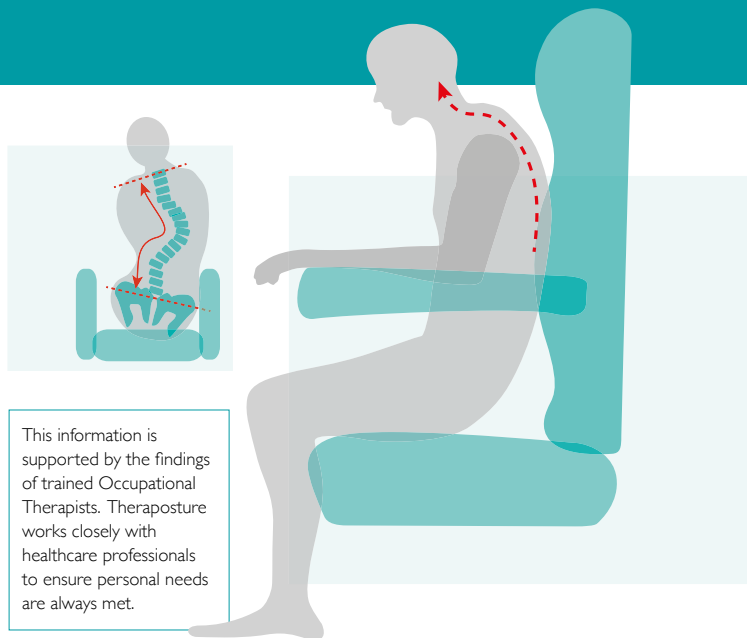

Stand and sit easier

Our chairs help you sit, stand and relax safely. When transferring from a seated to a standing position, your power-adjusted chair will support and assist you to make your movement easier and safer.

Better circulation, rest your legs

Owning a profiling chair with the correct seat height is essential for maintaining healthy blood flow and reducing pressure. If the distance between the floor and the top surface of your seat is too high or low, you can experience numbness and develop other problems. Having the ability to raise the foot rest up is a major advantage when aiming to prevent or manage swollen legs (oedema).

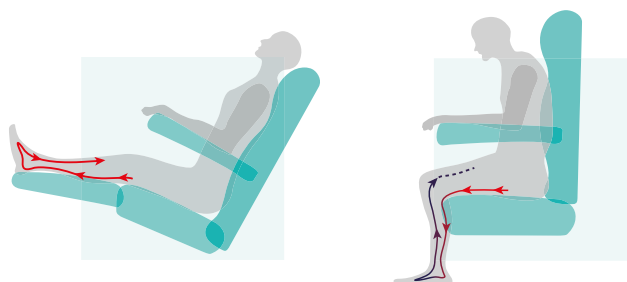

Improve your posture

Owning an adjustable chair that has been designed especially for you is so important. All of its dimensions need to match your personal body size and shape so perfect posture is maintained.

If the backrest is not supportive, sacral sitting can happen which results in curvature of the spine forwards, known as Kyphosis. Whilst if your seat is too wide, Scoliosis or curvature of the spine may also occur. These are serious issues and can be further complicated by pelvic rotation, that can develop from continual adjustment of your seated position if the chair is uncomfortable.

With a balanced posture, you can sit for longer periods happily and avoid additional pain, medical issues or becoming bed bound.

Sitting comfortably is only 5 simple steps away

1. Call us: 0800 834654

Telephone us today to discuss your needs with a caring specialist who is ready to listen. All our team have an understanding of certain conditions and resulting needs.

2. Free home assessment

Following a telephone conversation with us, we will arrange for a professional, trusted Theraposture Assessor to visit you at home. They will spend time with you gathering all the essential information needed, to prescribe the perfect adjustable chair for your situation. At this stage, there is absolutely no obligation to buy.

3. Detailed prescription

Once we have understood what you need and have measured you, the Assessor will give you a detailed description of the assistive chair that will help you remain independent. This easy-to-understand quotation, that includes the cost, will explain every aspect of the chair that will be made for you – from style, mechanism and fabric choice through to warranty details.

4. Handcrafting and delivery

When you place your order, we will handcraft a bespoke chair for you to the agreed prescription and keep you informed of progress. Once ready, we will arrange a convenient time with you to install your new chair at home and give you full instructions for safe use.

5. After sales suitability

Every Theraposture product comes with our 14-Day Suitability Guarantee to ensure that you are happy in every respect. Throughout the lifetime of your chair, we will be there to support you, especially if your needs change over time. Your independence is our commitment.

YOUR INDEPENDENCE, OUR COMMITMENT

Seat firmness

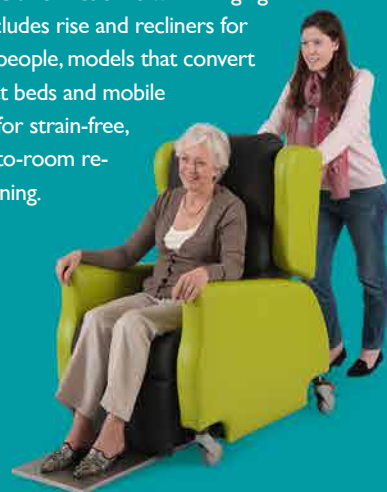

We can provide foam compositions to match clients of all sizes and weights to ensure that you are comfortable and properly supported. If pressure management is needed, we can build your chair with memory foam, Coolgel, Theragel, Theragel plus or dynamic air cushions.

Safety first

Whichever quality chair design you choose, rest assured it will be easy-to-use, safe and reliable. However if you live with pets or young children, we can fit anti-entrapment systems for added peace of mind. These proven solutions manage the risk of entrapment under the chair whilst it is lowered. Each chair can also be supplied with emergency battery backups.

Specialist solutions

If your medical condition requires more specialised support, we can design advanced chairs with more features to help with everyday living. Our selection is wide ranging and includes rise and recliners for larger people, models that convert into flat beds and mobile chairs for strain-free, room-to-room re-positioning.

Adjustable beds

In addition to chairs, we handcraft a range of made-to-measure profiling and height adjustable beds. Incorporating the same high quality finish as our chairs, these stylish beds will also deliver independence with peace of mind.
